Experience

Front End Developer | Batch

May 2018 – Present

- Led and contributed to website builds, both independently and as part of a team, using technologies like Craft CMS, Next.js, and Gatsby, including headless projects.
- Translated client requirements into UX wireframes for apps.
- Developed UI for apps using Vue.js (v2 and v3) and maintained UI systems for React projects.
- Contributed to internal documentation and supported junior team members.
- Prioritised accessibility and performance best practices in all projects.
- Assisted with ongoing client support and maintenance.

Front End Developer / Digital Designer | Custom D

May 2017 – December 2017

- Collaborating with other front-end and back-end developers to create websites, landing pages, email campaigns and web app components via an agile methodology.
- Keeping customers up to date on budgets, project deliverables and proactively suggesting improvements.
- Using SilverStripe, CodeIgniter and React alongside modern workflows including automation via grunt, BEM implementation via SCSS, and version control via Git.

Web Designer | Big Boy Websites

November 2016 – May 2017

- Designing and building unique and engaging websites using no code tools.
- Communicating with clients to effectively implement requested changes.

Claims Advisor | Earthquake Commission

November 2013 – June 2016

- Performing administrative tasks such as data entry, reviewing and updating claims, compiling claim packs, and handling internal and external inquiries.
- Additional responsibilities included overseeing team reporting, assisting with staff training, and managing a document tracking system at Fletcher's EQR Riccarton Hub.
